

CTE 101 Video Data

CTE learners are three times more likely than non-CTE learners and their parents to report that they are very satisfied with their ability to learn real world skills as compared to non-CTE learners and their parents.ⁱ

Over 75% of CTE learners enroll in postsecondary education after high school.ⁱⁱ

CTE learners have a graduation rate over 10 percent higher than non-CTE students.ⁱⁱⁱ

89% of parents think students should receive more education about career choices while in high school.^{iv}

Six of the ten hardest-to-fill positions are in technical fields or require a CTE background.^v

About half of all CTE learners are enrolled in programs in leading fields such as Health Care, STEM and Information Technology.^{vi}

More than twice as many CTE parents report being satisfied with internship opportunities for their students.^{vii}
