

Career Technical Education (CTE) is a proven strategy that expands options for learners, empowers them to choose a meaningful and sustainable career, and prepares them with real-world skills for success in college and careers. Through hands-on learning, engagement with industry experts and rigorous academic and career-focused coursework, CTE is learning that works for California’s students – and its economy.

## CTE Works for Learners in California

### CTE Enrollment<sup>1</sup>

**772,350**

High School

**892,396**

Postsecondary

### High School Graduation

**82%**

California Average<sup>2</sup>

**92%**

CTE Concentrators<sup>3</sup>

### Outcomes for Learners in California<sup>4</sup>

**93%**

high school CTE graduates enrolling in college, enlisting in the military or working within six months

**90%**

postsecondary CTE students staying enrolled and/or transferring

**88%**

postsecondary CTE students earning a credential, certificate or degree

**78%**

postsecondary CTE graduates placed in careers or further training within six months

- Fun fact: California has invested about \$1.4 billion in regional career pathways since 2013 through the California Career Pathways Trust, CTE Incentive Grants, the Strong Workforce Grant Program and other initiatives.<sup>5</sup>
- Fun fact: Students in the California Partnership Academies are more likely to pass high school exit exams, meet college entrance requirements and graduate from high school than their peers.<sup>6</sup>

## CTE Works for California’s Economy

- Middle-skill jobs – those requiring some postsecondary education and training, but not a Bachelor’s degree – account for 50 percent of California’s labor market.
- However, only 39 percent of workers in California are qualified to fill these middle-skill jobs,<sup>8</sup> leading to a skills gap that CTE can help address.
- In total, 263,076 associate’s degrees or certificates were awarded in California in 2015 – about 47 percent of all postsecondary degrees and certificates.<sup>9</sup>

In California, the top middle-skill occupations with the highest projected job openings are in the Health Science Career Cluster.<sup>7</sup>
