

Career Technical Education (CTE) is a proven strategy that expands options for learners, empowers them to choose a meaningful and sustainable career, and prepares them with real-world skills for success in college and careers. Through hands-on learning, engagement with industry experts and rigorous academic and career-focused coursework, CTE is learning that works for Hawaii’s students – and its economy.

CTE Works for Learners in Hawaii

Outcomes for Learners in Hawaii⁴

100%

high school CTE graduates enrolling in college, enlisting in the military or working within six months

76%

postsecondary CTE students staying enrolled and/or transferring

55%

postsecondary CTE students earning a credential, certificate or degree

66%

postsecondary CTE graduates placed in careers or further training within six months

- Fun fact: Students enrolled in Project Imua, a joint STEM program between four University of Hawaii community college campuses, developed and launched a payload from a NASA flight facility in August 2017.⁵

CTE Works for Hawaii’s Economy

- Middle-skill jobs – those requiring some postsecondary education and training, but not a Bachelor’s degree – account for 49 percent of Hawaii’s labor market.
- However, only 47 percent of workers in Hawaii are qualified to fill these middle-skill jobs,⁷ leading to a skills gap that CTE can help address.
- In total, 5,756 associate’s degrees or certificates were awarded in Hawaii in 2015 – about 37 percent of all postsecondary degrees and certificates.⁸

In Hawaii, the top middle-skill occupations with the highest projected job openings are in the Health Science Career Cluster.⁶
