PROFESSIONAL DUTIES

Provide a data-driven, student-centered counseling department that is comprehensive and supports student success in the areas of academics, social-emotional and career development. Through data-driven practices, our counseling department wants to ensure we are meeting the needs of all students by providing equitable and accessible services, which may consist of classroom lessons, small groups, individual counseling, community partnerships and program development. Implementation of these systemic services lends itself to the ultimate goal - helping students reach their post-secondary plans.
