

Advancing the National Career Clusters Framework National Advisory Committee

The Advancing the Framework National Advisory (NAC), launched in March 2023, consists of national and state CTE leaders who are providing expert insight into the decision-making and change management processes for the national project team during this initiative. While the NAC is not responsible for the eventual recommendations to update the Framework, they are providing strategic thought partnership about this initiative and helping guide the direction of the project team's work. Diverse representation of perspectives was vital to the composition of the NAC, including through gender, race, geographic area, learner level and area of expertise.
