Source: The nontraditional codes were determined by the National Alliance for Partnerships in Equity (NAPE; www.napequity.org)						
Please see the NAPE methodology document for additional details, or contact NAPE if you have questions regarding the non trad designation.						
NOTES: A nontraditional occupation is one that employs less than 25.0% of males (M) or females (F). Occupations that employ from 25.0% to 75.% of females are gender neutral (N). To calculate the percentage of male or female employment, NAPE used the same 2006 employment data from the Bureau of Labor Statistics that it used to develop its original nontraditional crosswalk in 2007. If more recent data (2011) were used, some occupations would move in or out of the nontraditional category. This would affect the calculations of performance indicators and, in turn, the ability to track performance through the						
1/ The NCES CIP-SOC Crosswalk has NO MATCH between this CIP and a related occupation. Consequently, there are no employment data to calculate whether or not the occupation is nontraditional.						
2/ When there is a 2/ following the M or F, it means that there is a change in the status due to either the new CIP-SOC Crosswalk or because of corrections to NAPE's 2007 crosswalk. <b>Please be aware that states who adopt these new designations may see significant changes in their calculated measures due to the resulting changes to the dataset used to calculate the measures, rather than actual changes in performance itself.</b> Please see the NAPE methodology report for additional details.						
NO CLUSTER--These CIP codes are used for programs that provide basic skills, citizenship, leisure and recreation, and self-improvement. They are generally not offered for postsecondary academic credit and have not been included in revised Table 7.
